

## What is Invisalign?

Invisalign is an orthodontic treatment using clear, custom-made aligners to straighten your teeth and correct your bite.

These virtually invisible aligners are a series of clear trays that fit comfortably over your teeth and gradually shift them into their ideal positions, until they achieve *your perfect smile*.

The aligners are removable, allowing for easy cleaning and eating. This minimally invasive treatment offers an effective alternative to traditional metal braces, without compromising on your comfort and appearance.

**Zaret Dental Center is a highly specialized Invisalign center, using top-quality European Clear Aligners to deliver exceptional results. We offer competitive prices, delivering highest standards and quality of American service.**

# INVISALIGN V.S. BRACES

## NICER SMILE

Aligners are practically invisible, giving you a regular aesthetic smile rather than very noticeable wires across your teeth with braces.

## FASTER

Studies have shown Invisalign treatment is significantly quicker than regular braces.

## CLEANER

The aligners are removed when eating and brushing, enabling the mouth and teeth to keep clean, without food getting stuck to wires and brackets in braces.

## COMFORT

Aligners are a lot more comfortable than braces where wires often irritate the mouth and cause much discomfort.

## LESS APPOINTMENTS

Patients only need to come for short appointments every 7-8 weeks.

## INVISALIGN PROCESS

### CONSULTATION

**Come in for a consultation  
with our orthodontist**

*He will give you a detailed treatment plan for your case, and a quote for the price of your treatment.*

### SCANS

**Take 2 scans**

*Our orthodontist will now design your specialized treatment and the lab will prepare your trays.*

### START

**Come in 4 weeks later to  
begin treatment**

*Once your aligners have arrived from the lab, you're all set to go!*
